Christy and Robbie,

I'm asking OSC Bob Whittier of my staff to take a look at this case and determine whether it falls under Superfund jurisdiction and whether there is viable role for the Removal program. If Bob determines there is not a role for us, then we will notify DEC of that finding and promptly remove ourselves from the group involved. I'm also copying Sylvia Kawabata as the manager of the Superfund NPL process, so she can determine whether there is a potential NPL interest in this project.

Thanks,  
Chris.

Subject: closing the loop on North Pole Refinery/sulfolane

Hello. Just wanted to close the loop, as both Robbie and I have been talking to the two of you.

After talking to Ann today, I am comfortable that the RCRA program does not need to be involved in the sulfolane investigations at North Pole refinery. Although we have an open 3008(h) order, the only thing it currently requires is submittal of progress reports, and sulfolane isn't even a hazardous constituent under RCRA. Ann is doing a great job keeping us in the loop via monthly progress reports from the facility, and she will keep me on the distribution list for technical team meeting notes.

It does make sense, though, that EPA be involved. Chris, Robbie said you agreed this was the type of thing we (Superfund) should stay abreast of.

So I am sending this email to be sure you both have each others' contact information.  
If there is any way we (RCRA) can be of help, please don't hesitate to call.  
Thanks! - christy
